STUDY TYPE

Demographic Surveillance

ABSTRACT

Verbal Autopsy are carried out to ascertain cause of death when access to medical care, accurate diagnostics and death certification are lacking. A medically trained interviewer speaks with a person who was close to the deceased leading up to the death, firstly asking them to describe in their own words what happened and then leading them through a series of closed questions related to the symptoms the deceased experienced. The narrative and responses are reviewed by two independent clinician who then assign cause of death. If they do not agree a third clinician reviews the case.

Verbal autopsy is carried out for all deaths that occur in the Karonga DSS. The questionnaire used has change over time, with the biggest change occurring in 2014 when the form was brought into line with the WHO version and was collected electronically.

Data collection is ongoing and data tables will be updated periodically.

Coverage

GEOGRAPHIC COVERAGE

The Karonga HDSS surrounds the port village of Chilumba, on Lake Malawi, in the southern part of Karonga District . The surveillance area is located between latitudes 10.388 and 10.508S and longitudes 34.088 and 34.278E, covering an area of approximately 135 km². The lake shore and the Nyika National Park form the boundaries to the east and west, respectively, whereas the boundaries to the north and south are delineated by village boundaries

UNIVERSE

Verbal autopsies are carried out for all deaths occurring within the DSS area, however they may also be used in other Karonga-based studies.

ACCESS CONDITIONS

These data are made available for licensed access under the following conditions:

1. Data and other material provided by MEIRU will not be redistributed or sold to other individuals, institutions or organisations without MEIRU's written agreement.
2. In the case of multi-centre datasets, data originating from a single contributing member centre of the collaboration may not be analysed or reported on in isolation without the express permission of the member centre concerned.
3. No attempt will be made to re-identify respondents, and there will be no use of the identity of any person or establishment discovered inadvertently. Any such discovery will be reported immediately to MEIRU.
4. No attempt will be made to produce links between datasets provided by MEIRU or between MEIRU data and other datasets

that could identify individuals.

5. Any books, articles, conference papers, theses, dissertations, reports or other publications employing data obtained from MEIRU will cite the source, in line with the citation requirement provided with the dataset.

6. An electronic copy of all publications based on the requested data will be sent to MEIRU.

7. MEIRU, MEIRU research collaborators and the relevant funding agencies bear no responsibility for the data's use or interpretation or inferences based upon it.
